CAREER OBJECTIVE

Results-driven MCA graduate with hands-on experience across Java, Spring Boot, MySQL, and React JS, skilled at designing and building scalable, well-structured software applications. Strong foundation in RESTful API design, database management, and object-oriented programming, complemented by working knowledge of modern frontend development. Continuously upskilled through structured training and self-directed learning between 2022 and 2024 before pursuing MCA. Seeking a Software Developer role to design, build, and maintain robust applications, with the flexibility to contribute across backend, frontend, or full-stack teams.

TECHNICAL SKILLS

- Frontend: HTML5, CSS3, JavaScript (ES6+), React JS, Responsive & Cross-Browser Design
- Frontend Concepts: Component-Based Architecture, Hooks, State Management, RESTful API Integration
- Backend & Database (Working Knowledge): Core Java, Spring Boot, MySQL, MongoDB
- Tools: Git, GitHub, VS Code, Eclipse, IntelliJ IDEA
- Core Skills: UI Development, Debugging, Problem Solving, Cross-Functional Collaboration

PROJECTS

Online Auction and Bidding System

Dec 2025 – Apr 2026

React JS, Java, Spring Boot, MySQL | [GitHub Repo](#)

- Built a responsive React JS frontend for browsing auctions, placing bids, and tracking bid history in real time.
- Designed reusable UI components and managed application state for a smooth, dynamic bidding experience.
- Integrated the frontend with Spring Boot RESTful APIs for auction management, bidding logic, and authentication.
- Implemented secure login and role-based UI views for Admin, Seller, and Buyer roles.

AI-MFA: Multi-Factor Authentication & Risk Detection System

Aug 2026 – Present

Java, Spring Boot, MySQL, React JS, JWT, TOTP, BCrypt | [GitHub Repo](#)

- Built a secure TOTP-based MFA system with Google Authenticator integration, OTP verification, backup recovery codes, and BCrypt password hashing.
- Developed Spring Boot REST APIs and a React JS frontend for registration, login, MFA setup, authentication, and security monitoring.
- Implemented an adaptive login risk detection engine using device- and IP-based location analysis to identify unusual login activity and generate risk scores.

WORK EXPERIENCE

Industry Exposure Program (IEP) – Virtual

May 2025 – Jul 2025

Personalized Industry Training Program | Python, AWS

- Gained hands-on front-end development experience using HTML, CSS, and JavaScript.
- Worked on back-end components using Python and explored AWS services (Lambda, S3, DynamoDB).
- Participated in the Cloud First Hackathon, applying cloud technologies to a real-world scenario.
- Used Git and VS Code for version control and collaborative development workflows.

CERTIFICATIONS

Full Stack Java Developer — NareshIT Technologies (Hyderabad)

Oct 2022 – Mar 2023

- Completed a structured 6-month training program covering Core Java, full-stack development fundamentals, and hands-on project work.
- Successfully completed with Grade A.

EDUCATION

Master of Computer Applications (MCA)

Jul 2024 – Jun 2026

GIET University, Gunupur, Rayagada | CGPA: 7.19

Bachelor of Computer Applications (BCA)

Sep 2019 – Jun 2022

Sambalpur University, Odisha | CGPA: 7.56

ACHIEVEMENTS

- Completed Industry Exposure Program on Python and AWS, including the Cloud First Hackathon.
- Successfully completed Full Stack Java / React JS Training with Grade A (NareshIT Technologies).
